

State Company for Grain Processing
Investment Projects

3-Macaroni and Spaghetti production plant.

- The suggested place for the construction of the plant for producing macaroni and spaghetti is the Taji Mill site.
- The capacity of the plant is 8 tons per day of both products using the semolina produced at the mill.
- The Taji mill site is close to the main Baghdad -Mosul road and side railway lines run in the site.
- The area required is about (12000)m² and is available at the site.
- The total cost of the plant (buildings and machines) is about (7.5) billions Iraqi Dinars.
- Iraq imports important quantities of macaroni and spaghetti .with the execution of this project there will be no need for the importation, in addition to using the semolina it is expected the cost of the plant will be refunded in about (8) years.
- The plant shall be constructed on (Turnkey) basis.
