

State Company for Grain Processing
Investment Projects

2-Packaging Plants

• The idea is to produce bags of 2kg and 5kg of white flour (0 type).
There will be one packaging station at each of the (16) mills owned by the State Company for Grain Processing. The capacity of each plant being 25 tons/day of either weight of packages.
In addition to two packaging stations at Dora mill and two stations at Taji mill. Each station of a capacity of 25 tons / day. i.e. a total of 20 packaging stations.

- The cost of the 20 stations is about (7.5) billions Iraqi Dinars
- No special area is required for the stations as they will be installed at the mills.
- The small packages enable the families to buy just their need of white flour and therefore reduce waste; this in the long run will have an economic return for the country.
- The packaging stations shall be supplied and installed on (turn key) Basis.
